STATEWIDE CROP SUMMARY
(Data provided by the National Agricultural Statistics Service Crop Progress and Condition Report)

General
There were 6.1 days suitable for field work.
Precipitation estimates ranged from trace amounts in multiple locations to 5.9 inches in Century (Escambia County).
The average temperature ranged from 67.5°F in Jasper (Hamilton County) to 83.6°F in Miami (Miami-Dade County).

Livestock and Pastures
Rainfall throughout the state improved pasture condition.
Cattle condition remained mostly good.

Fruits and Vegetables
Some fruit and vegetable producers were still experiencing challenges in finding buyers.
Excess rainfall in the northern peninsula caused disease pressures on watermelons and potatoes.
Whiteflies and aphids were spotted on tomatoes, peppers, and greens in the southern peninsula, but were mostly under control.

Field Crops
Excess rainfall in the northern peninsula caused disease pressures on corn and peanuts.
Peanut planting continued in the panhandle.
Some producers were expected to begin planting cotton once finished with peanut planting.
Potato harvest continued in the northern peninsula.

Citrus
Maximum temperatures ranged from the mid 80s to mid 90s across the citrus growing region, with Palmdale (Glades County) reaching 96°F.
Precipitation occurred over most of the citrus growing region with most areas receiving between 1 and 2.5 inches. According to the April 23, 2020 U.S. Drought Monitor, drought conditions lessened in parts of the Indian River District from moderate to abnormally dry. The rest of the citrus growing region continued to show severe to moderate drought conditions.
Valencia orange harvest continued strong, with over 3 million boxes harvested weekly.
Grapefruit harvest was winding down and tangerine harvest was nearly over for the season.
Grove activities included spraying nutritional, fertilizing, hedging, and general grove maintenance.
In some areas, old trees were pushed and replaced with new ones.
Irrigation was run routinely in all areas.
Orange trees were reportedly forming marble sized fruit, and grapefruit trees, marble to golf ball sized fruit.
