STATEWIDE CROP SUMMARY
(Data provided by the National Agricultural Statistics Service Crop Progress and Condition Report)

General
There were 6.3 days suitable for field work.
Precipitation estimates ranged from trace amounts in a few locations to 5.3 inches in Pensacola (Escambia County).
The average temperature ranged from 68.6°F in Glen St. Mary (Baker County) to 83.9°F at Hialeah (Miami-Dade County).

Livestock and Pastures
Cattle and pasture condition remained mostly fair to good throughout the state.

Fruits and Vegetables
A variety of fruits and vegetables were planted and marketed.
Much of the panhandle received rainfall, with some flood damage and field preparation/planting delays reported.

Field Crops
Cotton planting continued across the state.
Dry conditions limited peanut planting in some areas.
Sugarcane harvest continued.

Citrus
Maximum temperatures were in the mid 90s across the citrus growing region.
The citrus growing region received some beneficial rainfall, with LaBelle (Hendry County) receiving the most at 1.8 inches.
According to the May 6, 2021 U.S. Drought Monitor, parts of the southern area and Indian River District were under abnormally dry conditions, and a portion of Collier County was under moderate drought conditions. The rest of the growing region was drought free.
Valencias were harvested at just under two and a half million boxes weekly, with processing expected to continue through middle or late May.
Grove activities included mowing, fertilizing, hedging, herbicide application, nutritional application, taking care of young trees, general grove maintenance, and pushing/replanting of old trees.
Irrigation was run frequently in all areas.
Quarter to half dollar size fruit was reported for next season, with normal fruit drop occurring.
