STATEWIDE CROP SUMMARY
(Data provided by the National Agricultural Statistics Service Crop Progress and Condition Report)

**General**
There were 6.7 days suitable for field work.
Precipitation estimates ranged from no rain in multiple locations to 11.9 inches in Marathon (Monroe County).
The average temperature ranged from 68.5°F in Lake City (Columbia County) to 79.7°F in Naples (Collier County).

**Livestock and Pastures**
Most pastures continued declining due to hot and dry conditions.
Some producers began feeding hay.
Cattle condition remained mostly good.

**Fruits and Vegetables**
A variety of fruits and vegetables were harvested and brought to market in the southern peninsula.
Watermelon harvest began in the northern/central peninsula, but was nearly complete in the south.
Heavy rainfall damaged some of the crop in the south.
Some cabbage was disc’d under in the south due to diamond moth pressures.

**Field Crops**
Cotton and peanut planting continued, but was slowed in some areas due to lack of soil moisture.
Potato harvesting continued in the central and northern peninsula.
Small grains were harvested in the panhandle.
Grasshoppers were becoming a problem in the panhandle due to dry conditions.
Sugarcane harvesting was winding down.

**Citrus**
Maximum temperatures ranged from the mid 80s to low 90s, with Lakeland (Polk County) reaching 94°F.
The greatest rainfall occurred in Port St. Lucie (St. Lucie County), which received 1.7 inches, followed by Fort Pierce (St. Lucie County), which received 1.5 inches.
According to the May 14, 2020 U.S. Drought Monitor, the western, lower central, and Indian River Districts were all abnormally dry.
The remainder of the region was showing moderate or severe drought conditions.
Valencia orange harvest dropped below 3 million boxes harvested weekly.
Grapefruit harvest was winding down, and tangerine and tangelo harvests were over for the season.
Next season oranges were quarter to golf ball sized, and grapefruit were golf ball sized.
Grove activities included hedging, topping, spraying nutritionals and insecticides, fertilizing, mowing, and general grove maintenance.
Irrigation was run routinely in all areas.
