STATEWIDE CROP SUMMARY
(Data provided by the National Agricultural Statistics Service Crop Progress and Condition Report)

General
There were 6.7 days suitable for field work.
Precipitation estimates ranged from trace amounts in a few locations to 4.1 inches at Woodruff Dam (Gadsden County).
The average temperature ranged from 79.0°F in Niceville (Okaloosa County) to 85.5°F in Plant City (Hillsborough County).

Livestock and Pastures
Cattle condition improved to mostly good throughout the state.
Pasture quality improved due to recent rainfall.

Crops
A variety of fruits and vegetables were planted and marketed.
Recent rainfall improved cotton and peanut conditions. Cotton planting caught up with previous years, but squaring up remained behind the 5-year average.
Peanut planting was nearly complete and some began pegging.

Citrus
Maximum temperatures were in the high 80s to mid 90s across the citrus growing region, with Central Florida (Lake County) measuring 96°F, and Lakeland (Polk County), 94°F.
The citrus growing region received much needed rainfall, with Dade City (Pasco County) receiving 1.2 inches and Lakeland (Polk County) receiving 1.1 inches.
According to the June 10, 2021 U.S. Drought Monitor, several counties in the citrus growing region were under abnormally dry conditions, and parts of Collier, Hendry, and Martin counties were showing moderate drought.
Valencia harvest was nearly complete for the season.
Next season’s crop was progressing well, with oranges quarter to half dollar in size, and grapefruit slightly larger.
Grove activities included mowing, fertilizing, spraying, herbicide application, hedging, and general grove maintenance.
Irrigation was run frequently in all areas. Ditches were low and being refilled from reservoirs.
