STATEWIDE CROP SUMMARY
(Data provided by the National Agricultural Statistics Service
Crop Progress and Condition Report)

General
There were 6.3 days suitable for field work. Precipitation estimates ranged from 0.06 inches in Neptune Beach (Duval County) to 9.51 inches in St. Petersburg (Pinellas County). The average temperature ranged from 80.7°F in Jasper (Hamilton County) to 85.4°F in Jacksonville (Duval County).

Livestock and Pastures
Producers in DeSoto County planted and cut limpograss. Pasture quality continued to improve in the central and southern parts of the state due to adequate rainfall. Cattle condition remained mostly good.

Fruits and Vegetables
Watermelon harvest was reported in St. Lucie County. A wide variety of fruits and vegetables continued to be planted and brought to market.

Field Crops
Drought conditions in some areas of the panhandle slowed crop progress. Cotton and peanut condition declined. Hay was harvested in several counties. Tobacco harvesting was underway in Lafayette County.

Citrus
The citrus growing region remained warm, with daily highs in the 90s. The highest temperature, 94°F, was recorded at Mount Plymouth (Lake County). Daily rainfall throughout the central and southern parts of the region, but only sporadic rainfall throughout the rest of the region, resulted in dryer soil conditions. Lady Lake (Lake County) received the most rainfall, with 5.91 inches. According to the July 11, 2019 U.S. Drought Monitor, the entire citrus growing region remained drought free.

Grove activities included mowing, herbicide application, spraying, fertilizing, hedging, irrigation and general grove maintenance.

The new crop is progressing, with early and naval oranges approximately tennis ball size.
