Extension Agricultural Weather Report

STATEWIDE CROP SUMMARY
(Data provided by the National Agricultural Statistics Service Crop Progress and Condition Report)

General
There were 6.0 days suitable for field work. Precipitation estimates ranged from 0.17 inches in Melbourne (Brevard County) to 2.39 inches in Tallahassee (Leon County). The average temperature ranged from 79.2°F in Niceville (Okaloosa County) to 87.0°F in Plant City (Hillsborough County).

Livestock and Pastures
Pasture condition remained mostly good to excellent throughout the state, and cattle condition remained mostly good.

Crops
A variety of fruits and vegetables were planted and marketed.
Heavy tropical rains decreased peanut and cotton condition and producers expressed concern about persistent wet conditions.
Cotton setting bolls was nearly complete, but opening was behind the 5-year average.
Peanut digging was off to a good start, slightly ahead of the 5-year average, and they were nearly all done pegging.

Citrus
Maximum temperatures were in the high 80s to mid 90s across the citrus growing region, with Lakeland (Polk County) reaching 94°F, and both Sebring (Highlands County) and Plymouth (Lake County) reaching 93°F.
Most stations received one inch or less of rainfall. Clermont (Lake County) received the most at 2.00 inches.

According to the August 19, 2021 U.S. Drought Monitor, the entire citrus growing region was drought free.

Next season’s crop was progressing well, with oranges tennis ball to baseball ball in size, and grapefruit approximately softball in size.
Grove activities included mowing; fertilizing; herbicide, pesticide, and fungicide application; young tree replanting; nutritional application; and general grove maintenance.
Irrigation was run in areas of lower rainfall occurrence.
