STATEWIDE CROP SUMMARY
(Data provided by the National Agricultural Statistics Service Crop Progress and Condition Report)

General
There were 6.0 days suitable for field work.
Precipitation estimates ranged from little rain in some locations to 10.1 inches in Pensacola (Escambia County).
The average temperature ranged from 74.1°F in Jasper (Hamilton County) to 84.3°F in Cape (Miami-Dade County).
Substantial rainfall was reported across the state, with some flooding reported.

Livestock and Pastures
Pasture and cattle condition remained mostly good to excellent throughout the state.

Crops
A variety of fruits and vegetables were planted and marketed.
Cotton and peanut development progressed well, but harvesting activities were slowed due to persistent wet weather.

Citrus
Maximum temperatures were in the high 80s to low 90s across the citrus growing region, with Clermont (Lake County) reaching 93°F, followed by Vero Beach (Indian River County) at 90°F, and Kenansville (Osceola County) at 89°F.
Most stations received less than one inch of rainfall. Mount Plymouth (Lake County) received the most at 1.00 inches, followed by Clermont (Lake County) at 0.99 inches, and Vero Beach (Indian River County) at 0.79 inches.
According to the October 07, 2021 U.S. Drought Monitor, the entire citrus growing region was drought free.
Next season’s crop was progressing well, with oranges tennis ball to baseball ball in size, and grapefruit softball and larger in size.
Color break was reported in some grapefruit, early orange, and early tangerine groves.
Grove activities included herbicide, pesticide, fungicide, and nutritional application; mowing; dead tree removal; new tree planting; and general grove maintenance.
Irrigation was run in all areas.
